1. National Reports

National Reports of activities in geodesy and geophysics are requested from IUGG Adhering Bodies before each quadrennial General Assembly. These reports are useful to reference the expertise resident in each country and the unique opportunities for research and collaboration that may be available. National Reports have been received from Argentina, Brazil, Croatia, France, Hungary, India, Japan, Romania, Russia, the Slovak Republic, Switzerland, Thailand, and Turkey. If digitally available, the reports are posted on the IUGG website: <http://www.iugg.org/members/nationalreports/>.

2. IUGG General Assembly highlighted in EOS

Several articles have been published after the IUGG General Assembly by Randy Showstack, Senior Editor of EOS, Earth & Space Science News of the American Geophysical Union, who attended the assembly in Prague. The articles are as follows:

New Commission Aims to Protect Volcanic Geoheritage. Volcanic landscapes and regions provide valuable opportunities for scientific research, education, and sustainable geotourism, in addition to iconic scenery. The full article can be found at: <https://eos.org/articles/new-commission-aims-to-protect-volcanic-geoheritage>.

Global Research Push Urged on Environmental Disruption, Extremes. Seven resolutions by the International Union of Geodesy and Geophysics call for increased scientific contributions in areas

ranging from environmental threats to energy resources to satellite systems. The full article can be found at: <https://eos.org/articles/global-research-push-urged-on-environmental-disruption-extremes>.

Weak Shaking Lessened Nepal Earthquake Impact. Modest ground motion for such a big quake and some prior training in earthquake preparedness averted worse death and destruction, earthquake scientists say. The full article can be found at: <https://eos.org/articles/weak-shaking-lessened-nepal-earthquake-impact>.

Geoscientists: Focus More on Societal Concerns. The unprecedented toll from a powerful tsunami shocked a theoretical geophysicist, now an international geoscience organization leader, into action and advocacy to use science to aid society. The full article can be found at: <https://eos.org/articles/geoscientists-focus-more-on-societal-concerns>.

In addition, EOS published a report on the IAGA Project MAGNIO supported by IUGG and ICSU entitled “*Making the Northern Indian Ocean a Hub of Geomagnetic Data*”: <https://eos.org/project-updates/making-the-northern-indian-ocean-a-hub-of-geomagnetic-data>.

3. News from the International Council for Science (ICSU)

Nominations for the COSPAR Awards

The ICSU Committee on Space Research (COSPAR) bestows a number of medals and awards, in some cases jointly with other scientific institutions or space agencies. Nominations are open and must be received before 30 November 2015. More information can be found at the ICSU website: <http://www.icsu.org/news-centre/news/top-news/nominations-are-open-for-the-cospar-awards>.

Nominations for the WDS Data Stewardship Award

The call for nominations for the 2015 WDS Data Stewardship Award is open. The deadline for nominations is 7 September 2015. The winner will be announced in autumn 2015, and will be presented with the 2015 Award and a prize at SciDataCon 2016. Details of the call, including the nomination form, can be found <https://www.icsu-wds.org/community/data-stewardship-award/2015-award>.

4. Awards and Honors

Pierre Hubert, IUGG Bureau Member, received a Life Time Achievement Award from the National Geophysical Research Institute in Hyderabad (NGRI) and the Association of Hydrologists of India (AHI) for his outstanding contributions to the field of global hydrology.

Giuliano F. Panza (University of Trieste, Italy), President of the Italian National Committee for IUGG, has been designated as Knight of the Order of Merit of the Italian Republic. The honor cites Panza’s outstanding, internationally recognized scientific achievements related to geophysics and seismology.

Congratulations to Giuliano and Pierre!

5. Meeting calendar
